## Skin metamorphosis from the inside out

STEP 1

### PLATINUM HYDRAFACIAL™

Begin your skin transformation with a Platinum HydraFacial™ to deeply cleanse, exfoliate, and hydrate. Includes a customized booster. Non-invasive, no downtime, and immediate results.

STEP 2

### LYMPHATIC DRAINAGE

Optimizes skin health by encouraging detoxication and enhancing oxygenation of the skin through a mechanical massage to improve lymph circulation. Drains toxins and reduces puffiness instantly.

STEP 3

### MICRONEEDLING

This clinical procedure supplemented with a neuromodulator renders a smooth glass-like appearance to your skin. Generates new collagen and skin tissue to smooth, firm, and tone.

STEP 4

### LED RED LIGHT THERAPY

This 630nm wavelength of light stimulates collagen production, a protein responsible for younger-looking skin that diminishes with age, to promote skin anti-aging and reduce fine lines.

STEP 5

### CUSTOM SERUM

Thanks to the Universkin™ system merging biotechnology and AI skin analysis, we can truly customize a serum formulated to address your specific skin needs.

STEP 6

### theBespoke\\VibrantSkin SUPPLEMENT

Our exclusive research-based supplement formulated by our N.D. team will protect your skin from oxidative stress, free radicals, and premature aging.
